## The Alpaca Registry

Administered by  
Grassroots Systems Ltd  
on behalf of  
British Alpaca Society (BAS)

**Policy, Procedure and Regulations** of the BAS Pedigree Register is provided to all members of BAS and is available on application.

**This application form may be used to register Cria born within the UK, whose parents are both registered in the BAS register.**

**Inspection** - Imported animals, foundation animals (resident in the UK prior to 17th March 1999) and Cria who have one or more parent not registered in the BAS register, may be registered after inspection/screening. Please apply for the relevant forms, and see the BAS Policy Procedure and Regulations document for details.

**Terms and Conditions** - Only fully paid up members of the BAS may register Cria in the BAS Alpaca Registry.

**Time limit** - Application for registration should be made within 6 months of birth, or within four weeks of sale, whichever is the sooner. Late application may incur late registration fees.

**Applicant** - The original breeder or his/her designated agent must apply for registration. Subsequent owners may not apply for registration.

**Ownership** - The mother of cria to be registered must be in the registered ownership of the breeder. The father must either be owned by the breeder, or this form must be accompanied by a service certificate.

### Completing the form:

**Date of Birth:** DD/MM/YY

**Notification, Registration or Non Breeder** - please tick the relevant box. (Notified animals may subsequently be registered)

**Sex:** please indicate if the animal is Male / Female or Non Breeding.

**Description:** Please tick the boxes to indicate: The 'type' of the animal: Huacaya or Suri

**Sire & Dam:** Both parents must be registered with the BAS register. Please complete the registered name and BAS identification number or EID microchip number for both parents.

**Cria ID:** Affix the EID barcode sticker or fill in the numbers in the boxes provided. Fill in the ear tag number. Both the microchip and tag number must be unique to that animal. Tags and microchips are available from Tagmaster (Tel 01450 370695)

**Cria Name:** Your registered Herd Name of no less than 2 and no more than 15 letters will form the first part of the animals name. The full name must have no more than 30 characters (including symbols, punctuation and spaces) and must differ by at least one letter from all other names in the BAS Registered database. Names must not be misleading or offensive. Names may be changed for Cria under 12 months of age provided they have no registered offspring and have not been sold.

**Description:** Please tick the boxes to indicate:  
The colour of the eyes: Brown(solid) or Blue(flecked)  
The body colour: Tick S for solid and one colour box, Multi, or tick a primary and secondary colour  
Blk-Black            W-White            RG-Rose Grey  
LF-Light Fawn      MF-Mid Fawn      DF-Dark Fawn  
LBr-Light Brown    MBr-Mid Brown    DBr-Dark Brown  
LG-Light Grey      MG-Mid Grey      DG-Dark Grey

Use the comments box to reference information on defects, or special characteristics.

## The Birth of ALL Cria should be reported to the Registry

There are three categories in the registry

**Registered:** Fully registered pedigree animals who may be the parents of registered Cria in the future.

**Notified Males** - young males notified to the registry which are eligible for full registration at a later date.

**Non breeding Animals** - males or females which have been notified to the registry. They may **not** be the parents of registered cria in the future. These will include castrated males and animals with defects. The inclusion of these animals in the register is essential to help build data on the national breeding herd.

### REGISTRY FEES

All fees are inc VAT @17.5%

Registration	£17.62
Late Registration	£58.75
